- HTML
- CSS
- JavaScript
- ReactJs
- Python
- C/C++
- Java
- GitHub
- Tailwind

PROJECTS

Online Voting System (College Project)

A secure and efficient platform for conducting online elections. Built with React (frontend), Laravel (backend), and MySQL (database), it features user authentication, real-time voting, and an admin dashboard for managing elections.

[Github Repo](#)

Country Explorer

Designed and developed a responsive web application using React.js and the REST Countries API. Implemented features such as dynamic country search, regional filtering, detailed country insights, theme toggling, and mobile-first responsive design.
